

Macro Sells its 60th Double Bubble line, and 10th at a Customer in South America

Film and sheet extrusion machinery supplier Macro Engineering & Technology Inc. (Canada) has sold its 60th double bubble line in the world, and it is also the 10th supplied to the same customer in South America.

“We are honored to be the chosen supplier to one of the leading producers of shrink bags in South America. We are one of the few equipment suppliers in the world who has successfully provided customers with the tools to process PVdC, Nylon and EVOH. We take customers’ wish-list, custom design equipment to their particular needs, and turn their wish-list into reality” Says Jim Stobie, Macro’s CEO.

Macro is able to provide double bubble shrink film lines up to 11 layers and up to 900mm. Film thicknesses range from 20 μ to 100 μ . The double bubble line is also equipped with different annealing options depending on the applications to provide low shrink, medium shrink and high shrink options.
